

**Draft Agenda
Hunters Point Shipyard
Property Transfer Conference Call
Regulatory Agencies, Navy, City and Fivepoint**

**Thursday, December 3, 2020
1 to 2 pm**

Conference Call Number sent on calendar invite

1) Introductions

Navy – Derek, Marvin, Paul, Heather, Thomas

EPA – Wayne, Yolanda, Brianna, John

DTSC/CDPH – Nina

City – Amy, Cristina, Chris

FivePoint – Jim and Gordon

2) Agenda Review

3) Dates for: next conference call January 21, next, next Feb 25 (Thursday)

4) Parcel G field work & related and 5YR including Tech Memos

Parcel G fieldwork update – Completed four of the trench unit excavations; six trench units ongoing (close to halfway done) and excavation on something else. Analytical data back on one of the trench units and no exceedances. Thomas had asked if EPA had any data, yet. Wayne said EPA handed our samples to CDPH and has not heard any results, yet. It's possible CDPH has a long processing time for the fieldwork. Paul asked a question about the access agreement for building storage. Brianna said EPA had completed a legal review and we needed to get it signed. Navy is eager to get this signed.

5YR Building RG Evaluation – Thomas said the Navy is working on a response to EPA's August letter to the evaluation. Thomas was unwilling to provide an update and gave the ball to John. John said that Lawrence and Kim didn't have much of an update, as the letter is being reviewed "up the chain." Marvin added that there have been a number of technical exchanges between the EPA/Navy staff over the past three months.

Communicate the timeline of Parcel G fieldwork – Yolanda mentioned at the Shipyard Artists meeting two weeks ago, I was surprised to learn the Parcel G phase 2 fieldwork was expected to go through May 2022. Amy reminded folks they used to have "notional timelines" at the Tiger Team meetings and agreed it would be helpful to have something like that (visual and communicative). The Navy is preparing a basewide community schedule for one of those upcoming meetings.

5) Updates on communications and meetings

Navy FOIA review – continuing to work on the ongoing FOIAs (Allston Bird with Five-Point, which has been whittled down to 17 items from over 100; and Altern? Finance

report FOIA). The FOIAs are not in high visibility. Navy is trying to collaborate with EPA on the Fagone/49ers FOIA, as the Navy found 10 EPA records. The Navy was told to send the records to Brianna.

EPA FOIA review – EPA is also working on a lot of expensive/comprehensive FOIAs. These are a heavy burden for the agencies to respond; it's becoming a big part of the workload for the entire team. Perhaps we can discuss a future repository for these documents. The Navy and EPA both have been using FOIA online, where the responses are publicly available. EPA mentioned that older FOIAs seem to be unavailable.

State – still working on the public information request from last year.

OCII/SFDPH – nothing new on public information request front.

Navy virtual community open house event in March – The website will be available for a week with two Q&A sessions.

Contra Costa County Board of Supervisors meeting on December 15 will likely include an agenda item on the Keller Canyon Landfill. Marvin mentioned the conclusion was that it was unlikely that radiological waste ended up at the landfill, due to various protocols in place. John added a number of residents were concerned about exposure to radiation. The report will provide some recommendations that the BOS could consider sampling.

6) Miscellaneous Items

7) Action Items
